

Our Plastic Solutions in Building & Construction

At the heart of your life

Ravago Manufacturing is a global producer of high-quality plastic compounds including polyolefins, thermoplastic elastomers, rubbers and engineering plastics. We offer both virgin and recycled grades in many polymer types and have extensive knowledge and expertise in the plastics industry. We work together with our customers to deliver solutions for their most demanding application needs.

DIY & professional applications

Our high-quality plastic compounds can be used across a wide range of building and construction applications. With many combinations of fillers and additives available, you can achieve the desired performance for your application. Flame retardant options are also available for many grades. We offer both virgin and recycled compounds depending on your requirements.

Here are just some of the places you can already find Ravago products in building and construction:

Electrical & electronics

Ravago compounds can also be used in many electrical and electronics applications. Whether you are looking for UV stability, impact resistance, heat stability or colourability, we've got you covered with a wide range of fillers and additives to choose from, as well as flame retardant options. Both virgin and recycled compounds are available to suit your needs.

Here are just one example of where you may find our products in a solar panel application:

 Post-industrial recycled content

Contact us

We would love to hear from you and discuss further how we can support you in your building & construction and Electrical & Electronic (E&E) applications. You can also reach out to us for product design recommendations and advice on designing for recycling.
